

Slimy the Slug

Slimy the slug has just crawled out of the pond and wants to get to the tasty garden at the top of the hill. The garden is 10 metres away from the pond.

Slimy climbs 3 metres every day, but then needs to take a rest overnight. When Slimy rests, he slides back 1 metre.

If Slimy starts climbing on Monday morning, when will he finally get to the garden?

SOLUTION TO SLIMY THE SLUG

On Monday, Slimy gets to 3 m.

Tuesday morning he starts at 2 m (because he slid back in the night) and climbs to 5 m.

Wednesday morning he starts at 4 m and climbs to 7 m.

Thursday morning he starts at 6 m and climbs to 9 m

Friday morning he starts at 8 m and finally gets to the garden 😊
